

Jeremy has written up Lottie the Springer Spaniels notes after a consult, but wasn't really paying attention- can you help our receptionists and nurses unscramble the mixed up words, so that they can read them please?

- 1) INGTAIW MROO
- 2) EMXAIEND.....
- 3) YSPA.....
- 4) TSIELCN.....
- 5) RWOCSETRE.....
- 6) PNEOHELET.....
- 7) NKSI.....
- 8) YTCHI.....
- 9) DPISESEN.....
- 10) DEMCAITON.....
- 11) DOOLB.....

Now that you've helped do that- are you able to fill in the blanks with your answers to make sure everybody can read his notes please?

This morning, I fetched Lottie from the, she was on good form and as I her, I was more than happy to perform the operation. I spoke with the and they were going to head into for a while whilst I operated, so I said that I would them when I was done and let them know how Lottie was doing. I chatted with them about the potential of Lottie's being a little bit Whilst she healed and any side effects to look out for. Please would you Lottie's and tell the clients that I will call them with the results from the tests I did this morning, thank you!
